BRAND BOOK

Wellness You Build Everyday.

Version 1.1 / Internal review / September 2026

A working guide to WYBE

One identity. Clear standards for every expression.

03-09	Brand foundations
10-14	Voice and naming
15-23	Visual identity
24-30	Digital and apparel
31-34	Arabic, handoff and reference

How to use this edition

The name, logo reference, colours, fonts and tagline come from the founder. This book proposes the supporting rules and copy for internal review.

Arabic lettering and garment images are concepts. Production artwork and physical samples need their own sign-off.

Education that builds independence

Understand.
Practise.
Build confidence.

WYBE helps people understand their thinking, food and movement so they can make informed decisions and build confidence in daily life.

Support remains available as needs change.

The reason WYBE exists

Wellness is something people build every day.

Origin

Mansoor Ahamad Ali built WYBE around the belief that understanding helps people make lasting changes. His approach brings together mind coaching with education in movement and nutrition.

Purpose

To help people understand their minds and bodies, make confident life decisions, and build habits that support wellbeing.

Vision: a world where reliable wellness knowledge becomes part of everyday life.

What we think, eat and do

THINK

The mind comes first

Coach how people think and respond. Build self-awareness and follow-through for life decisions and daily habits, including training, eating and sleep.

EAT

Knowledge creates flexibility

Teach food literacy, ingredients and nutrient roles. Help people build meals they understand and enjoy.

DO

Practice builds capability

Demonstrate technique and explain it. Create space for the client to practise and receive feedback.

Expertise with different levels of support

Global coaching and guidance

For people seeking clarity in life decisions, healthier habits or focused fitness and nutrition guidance. Clients can choose support that suits their needs and budgets.

Premium personal training in the UAE

For high-net-worth individuals seeking sustained personal attention and individually planned coaching. A limited client roster supports the depth of service.

The standard stays consistent.

Expertise, clarity and respect belong in every service. The difference is the level and continuity of personal support.

Internal audience definition. Public copy should describe service quality and fit rather than a client's wealth.

The service family

Mind Coaching (Personal Coaching)	Personal coaching that helps people understand their thinking and make their own decisions about daily life, careers and relationships.
Workout Programs	Structured training for people ready to follow a plan independently.
Fitness Consultation	Focused education in exercise technique, with demonstrations and feedback. Online globally and in person in the UAE.
Nutrition Consultation	Education about food, ingredients and nutrients that supports informed shopping and personal meal planning.
Personal Training	Ongoing, personalised coaching in the UAE, with the attention of a deliberately limited client roster.

Use the website for current packages, prices and availability. Keep this book independent of temporary offers.

Nutrition consultation

The client learns how to make food decisions.

01	**Understand food**	Explain the role of nutrients and how food choices relate to the person's everyday needs.
02	**Read and compare**	Practise reading ingredient lists and nutrition information using familiar foods.
03	**Build personal choices**	Help the client apply what they learned to shopping, cooking and planning varied meals.

Desired outcome: practical food literacy. Avoid describing a consultation as a professional nutrition qualification.

Fitness consultation

Focused teaching, with room to return.

A typical learning sequence

Discuss the client's goals and the movements they want to understand. Demonstrate technique, explain the reasoning, and watch them practise where the session format allows.

Independent practice

The client takes that understanding into their own training. They can book further guidance when they want feedback, clarification or help with a new movement.

Sample message

“Learn the technique. Understand the reason. Keep building your confidence.”

Describe technique and risk awareness responsibly. No training method can promise an injury-free outcome.

The WYBE voice

Confident

State the point directly. Explain what the client can learn and how a service works.

Knowledgeable

Use accurate terms, then translate them into everyday language.

Encouraging

Respect the starting point. Make progress feel achievable without pressure or shame.

Personal

Speak to the person's question. Keep the founder's presence warm and attentive.

The message hierarchy

PRIMARY PROMISE

Knowledge you can use.
Confidence you can build.

Short introduction

WYBE offers mind coaching, fitness and nutrition education, structured workout programs and personalised training to help people make confident life decisions and build lasting habits.

Supporting proof

Show the teaching process, explain your reasoning, and describe the support clearly. Link to relevant credentials and use authentic client experiences with context.

The primary promise is proposed campaign copy. The official tagline remains “Wellness You Build Everyday.”

Voice in practice

PREFER	AVOID
“Learn to read food labels and make choices that fit your life.”	“Follow my diet perfectly. No excuses.”
“Understand your technique and practise with greater confidence.”	“Injury-proof your body in one session.”
“Personal coaching shaped around your needs and progress.”	“Elite results guaranteed for everyone.”

Use: understand, learn, practise, confidence, technique, progress. Avoid: guilt, punishment, miracle, guaranteed.

Evidence and trust

Specific explanations	Explain what the claim means. A scientific term should make the idea clearer.
Traceable claims	Connect educational claims to an appropriate source. Separate established guidance from an individual example.
Accurate credentials	Use the exact qualification title, awarding body and current status. Keep supporting records accessible.
Honest outcomes	Use permissioned stories with context. State that results vary. Avoid guarantees of transformation, safety or medical benefit.

Brand communication standard. Keep individual advice within the practitioner's qualifications and scope.

One brand, thoughtful personal attribution

WYBE

Pronounced “vibe”

The main identity

Use WYBE on the website, in brand introductions and on future apparel. Spell the brand in uppercase in ordinary text.

WYBE with Mansoor

@wybewithmansoor

The personal expression

Use for presenter credits, social profiles and selected founder content. Future authorised contributors may use “WYBE with [Name]”. Keep WYBE visually dominant.

Official tagline: Wellness You Build Everyday. “With Mansoor” is an attribution, not a replacement tagline.

Power through clarity

A distinctive mark. Strong typography. Deliberate space.

The primary mark

Soft black on white

White on soft black

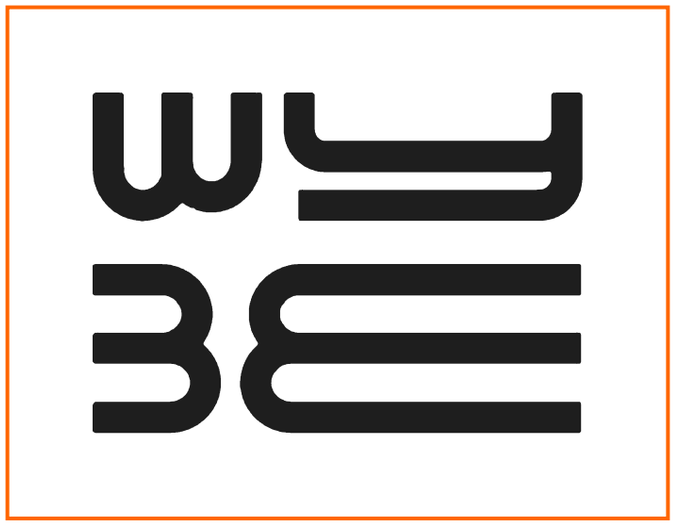

Orange on soft black

White on orange

Use a single solid colour. Preserve the complete stacked artwork and its proportions.

Clear space and minimum size

H = full logo height

Clear space = H / 4 on every side

Protected space

Keep text, page edges and other marks outside the clear-space boundary. Use more space when the composition allows.

Starting minimums

Digital: 48 px logo width.
Print: 15 mm logo width.
Apparel: begin at 25 mm and test the actual production method.

Proposed starting sizes. Check the smallest real output for open gaps and recognisable letterforms.

Logo integrity

Correct proportion

Avoid stretching

Avoid rotation

The artwork stays intact

Do not rearrange the letters, redraw parts, add outlines or effects, or place the mark on busy areas that obscure its form.

Colour stays controlled

Use the specified solid brand colours. Choose a clean contrasting background and retain the protected space.

The colour system

Soft black

#1E1E1E

RGB 30 / 30 / 30

Safety orange

#FF6600

RGB 255 / 102 / 0

White

#FFFFFF

RGB 255 / 255 / 255

Soft black gives structure. White gives space. Orange directs attention.

For ordinary layouts, start with a dominant neutral background and use orange selectively. A full orange background works for a short, decisive statement.

Readable colour combinations

White and soft black

Suitable for normal text.

Soft black and orange

Suitable for normal text.

Orange and white

Avoid for functional text, including large headings.

AA reference: normal text needs 4.5:1. Large text needs 3:1.

Source: W3C WCAG 2.2, Understanding SC 1.4.3. Ratios calculated from the exact brand colours.

Typography

INTER BLACK

Main headings / Weight 900 / Short, decisive statements

Raleway SemiBold

Subheadings / Weight 600 / Structure and emphasis

Raleway Regular

Body copy / Weight 400 / Clear explanations and comfortable reading

Keep headings compact. Use sentence case for body copy. Use these three weights consistently.

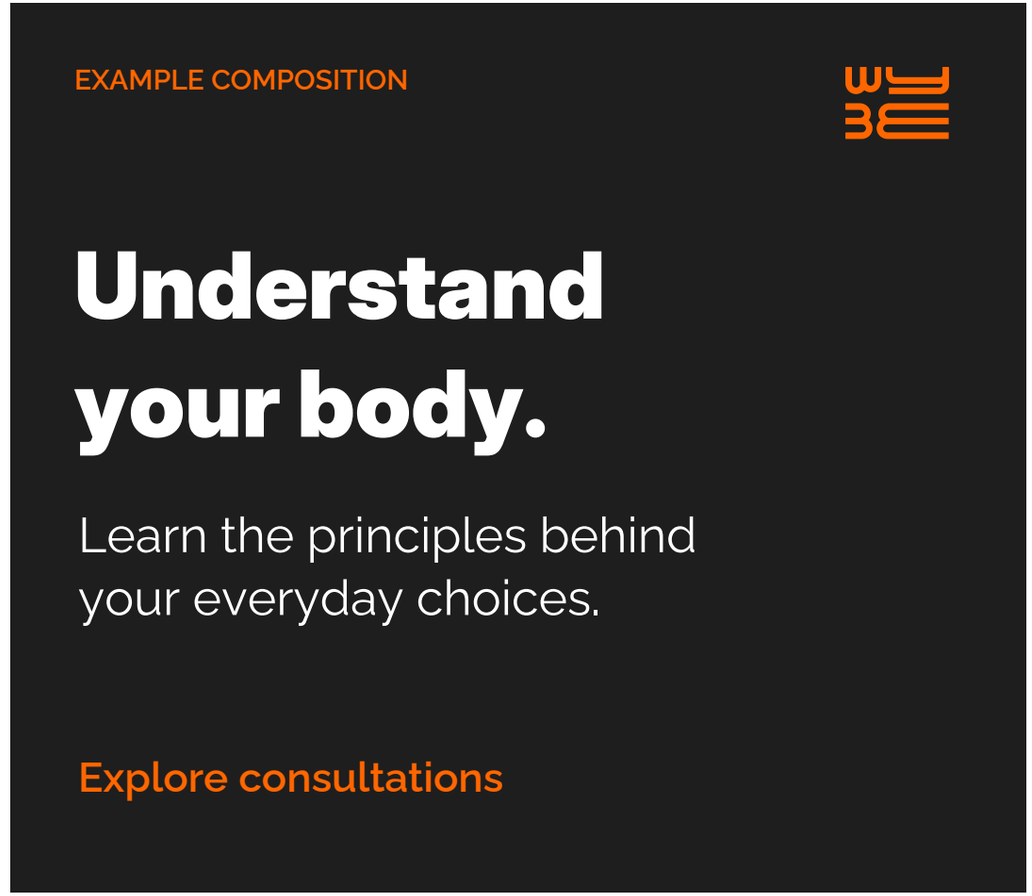

Type scale and composition

A repeatable hierarchy

Website starting sizes:
H1: 64 px desktop, 40 px mobile.
Subheading: 24-28 px.
Body: 18 px, line height 1.5.
Adjust with the actual content and viewport.

Space and alignment

Use a consistent left edge. Keep text columns comfortable to scan. Start with 6-8% outer margins on social artwork and separate ideas with space.

Scale and spacing are starting rules. Preserve readability at the final viewing size.

Photography direction

Teaching in action

Show people reading, asking questions, learning technique and making decisions. Let the moment explain the service.

Natural and precise

Use credible body positions, natural skin texture and restrained backgrounds. Keep food colours realistic. Preserve room for headlines.

AI-generated direction reference. It does not depict WYBE clients or document actual sessions.

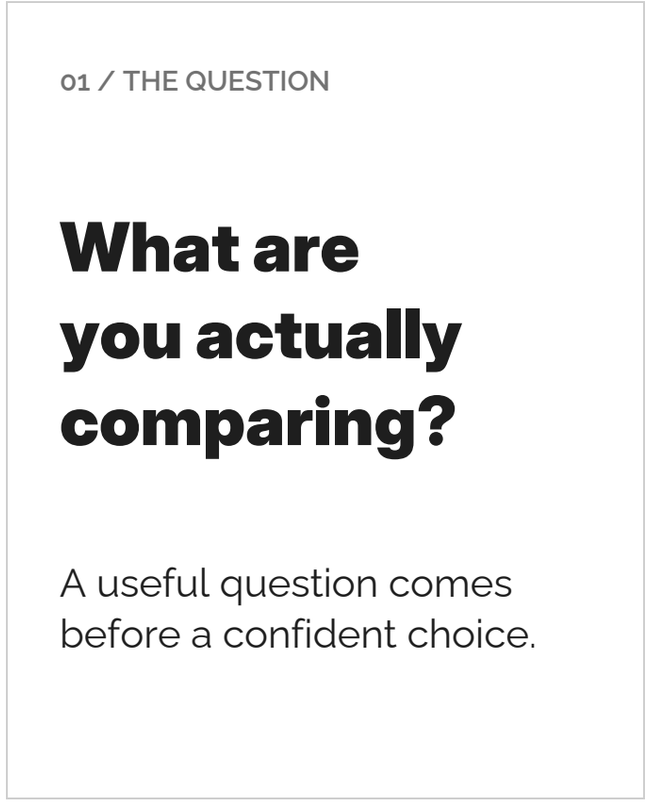

The social content system

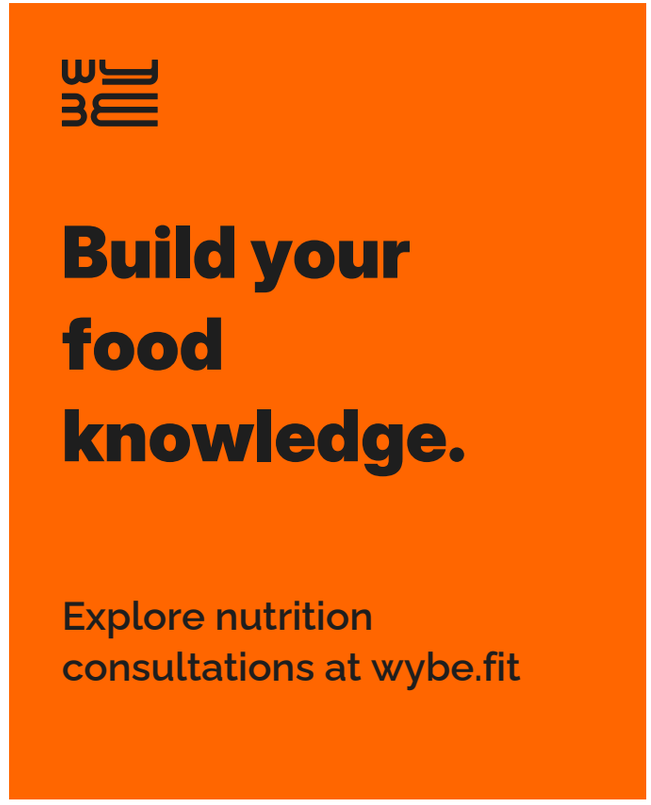

Food literacy	Ingredient reading, label interpretation, shopping choices and the reasoning behind meal decisions.
Movement education	Exercise setup, technique explanations and answers to common training questions.
Mind and everyday life	Self-awareness, life decisions and habits, including career direction, relationships, and consistency with training, food and sleep.
The practitioner	Mansoor's teaching approach, relevant credentials and clear introductions to each service.

Each post should leave the audience with one useful idea and one appropriate next step.

Instagram teaching layouts

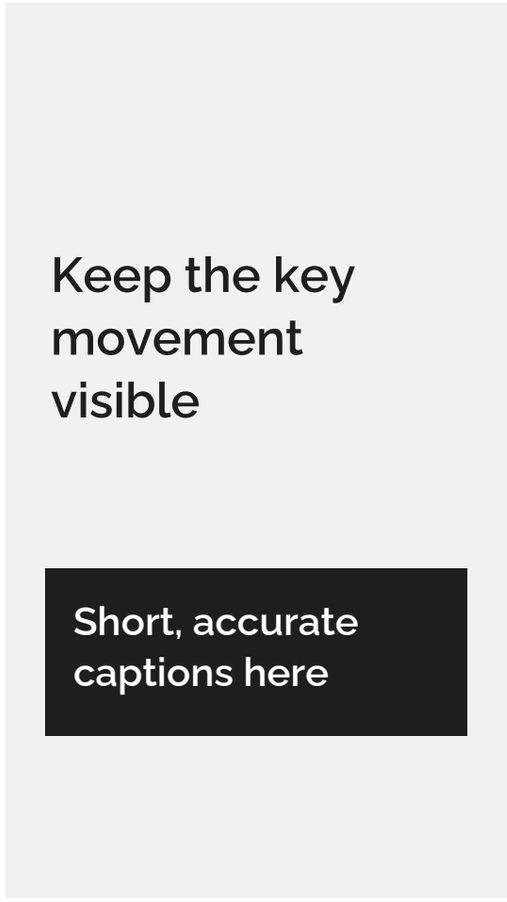

Example 4:5 carousel sequence: a clear topic, one teaching point, and a relevant invitation.

Working canvas: 1080 × 1350. Recheck current platform crop and preview before publishing.

Reels, TikTok and Shorts

Opening

Name the question in the first frame. Keep the title short enough to read at a glance.

Teaching

Keep the body or demonstration visible. Add corrected captions and leave room for platform controls.

Ending

Offer one next step: save the lesson, ask a relevant question, or explore the service.

Working canvas: 1080 × 1920. These are composition studies. Test the actual interface overlay before publishing.

YouTube titles and thumbnails

A single subject

Use a specific topic, a short headline and a clear focal point. Keep essential text away from the lower-right duration overlay.

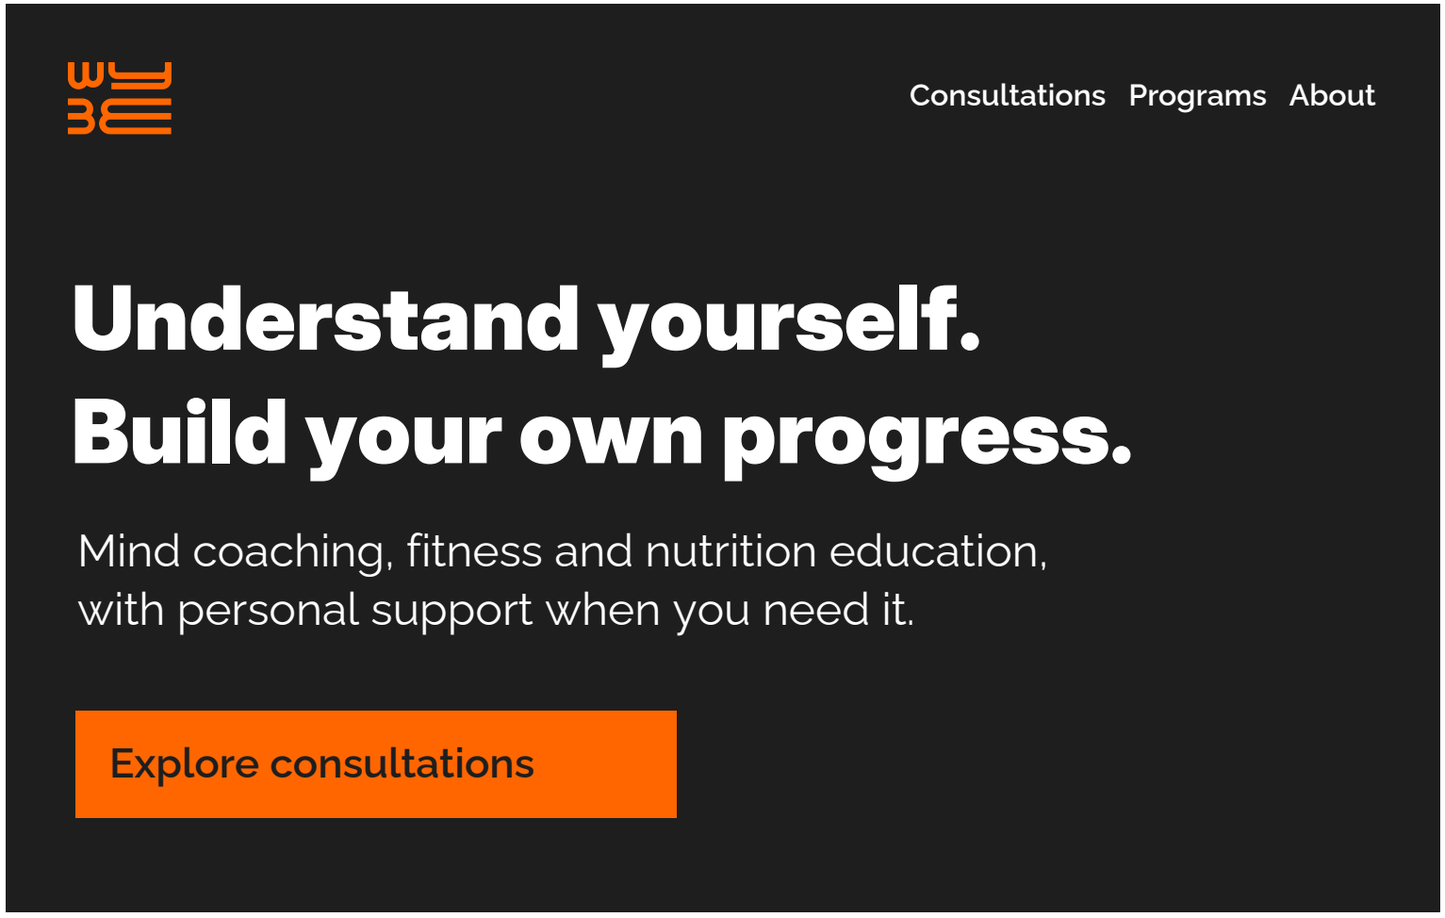

Title example

“What a fitness consultation can teach you about exercise technique”

Working canvas: 1280 × 720. The thumbnail and video title should describe the actual lesson.

Motion: simple cuts and short fades. Keep the logo stable and captions readable.

Website expression

Clear decisions

Explain what each service teaches, who it suits, how it works and what the client receives.

Consistent controls

Use soft black text on orange calls to action. Preserve visible focus states, descriptive labels and readable text.

Proposed visual and copy direction for future website updates. This book does not change the live site.

Apparel direction

Understated branding. Recognisable identity.

Start with neutral garments, a compact mark and considered placement. Let the logo remain clear at a distance.

AI-generated product concept. Garment construction, logo placement and colours require physical sampling.

Apparel production principles

Placement

Suggested starting widths: 50-70 mm on the left chest, 25-35 mm below the back collar, and 25-40 mm on a hem or sleeve. Adjust to the garment size and seam positions.

Methods

Use a clean vector master for printing, transfer or embroidery digitisation. Check that small gaps remain open and that the technique suits the fabric.

Colour matching

The HEX palette defines screen colour. Select print ink, thread or fabric against a physical reference and approve a sample. Screen colour does not specify a textile dye.

The sample check

Review placement, stretch, wash behaviour and legibility on the actual garment. Record the approved material, method and supplier settings for repeat orders.

These are brand placement proposals, not garment patterns, technical packs or manufacturing tolerances.

An Arabic companion expression

CONFIRMED ARABIC SPELLING

WYBE / pronounced “vibe”

Geometric direction

A compact Kufi-inspired treatment relates to the structure of the Latin mark.

Calligraphic direction

A softer Naskh treatment offers an expressive option for selected cultural or apparel uses.

Spelling: waw, alif, ya, ba. Lettering styles remain concepts for review. Preserve correct joining and dots.

Brand assets and ownership

Core assets	Keep the master logo, approved variants, palette and font references in one versioned folder.
Working files	Use descriptive names: WYBE_Logo_Orange.svg and WYBE_Instagram_Education_v01. Keep originals separate from exports.
Production masters	The logo in this book derives from the supplied JPEG. Obtain the designer's original vector artwork before garment production.
Brand owner	Mansoor approves changes to the identity, contributor naming and new applications. Record the date and reason for each revision.

This edition supplies the brand book and editable layout. Font files and manufacturing artwork are separate assets.

WYBE at a glance

Wellness You Build Everyday.

Name	WYBE. Pronounced “vibe”.
Colours	Soft black #1E1E1E / Orange #FF6600 / White #FFFFFF
Type	Inter Black / Raleway SemiBold / Raleway Regular
Voice	Confident, knowledgeable, encouraging and personal.
Purpose	Clearer thinking, informed choices and habits that support wellbeing.
Attribution	WYBE with Mansoor, used selectively.

Reference and edition notes

Founder-confirmed foundation

Audience, service approach, brand spelling, pronunciation, tagline, exact colours and type roles come from the founder's brief. The website provides the background and current service context.

Proposed in this edition

Positioning copy, voice rules, clear space, minimum sizes, layout scales, digital examples and apparel placements are proposed working standards. Arabic lettering and garment visuals are concepts for review.
